

Subject: Neurotology Opportunity – Jacksonville Hearing & Balance Institute

---

I am seeking a neurotologist to join me at the Jacksonville Hearing & Balance Institute (<https://jhbi.org>) in Jacksonville, Florida. The institute is a well-established, academically oriented, high-volume center dedicated to comprehensive care of patients with disorders of hearing, balance, and the lateral skull base. We provide the full spectrum of otologic and neurotologic care, including cochlear implantation, chronic ear surgery, stapes surgery, acoustic neuroma management, and advanced vestibular evaluation and treatment.

The practice is supported by a highly experienced team of six audiologists, three physician assistants, and outstanding clinical staff, allowing a strong focus on patient care. We also participate in multiple clinical trials involving cochlear implants and other neurotologic technologies.

The Jacksonville Hearing & Balance Institute is a division of North Florida Surgeons, one of the largest groups of independent surgeons in the United States, providing excellent reimbursement and administrative resources. We work closely with Baptist Medical Center Jacksonville and Lyerly Neurosurgery (<https://www.baptistjax.com/doctors/lyerly-neurosurgery>) for complex neurotologic and skull base procedures. Opportunities exist for ambulatory surgery center and medical office building ownership as a partner in the practice. In addition, the institute includes a hearing aid dispensary that provides ancillary income and comprehensive patient care. We are also actively involved in our nonprofit, Hearing Help for Africa (<https://hearinghelpforafrica.net>), which provides education, medical care, and hope to underserved populations.

This position offers access to a large and growing referral base throughout Northeast Florida and Southeast Georgia, with the opportunity to build a robust surgical and clinical practice in a collaborative environment with excellent hospital resources and state-of-the-art diagnostic capabilities.

Jacksonville is a vibrant coastal city with a metro population of 1.7 million and an outstanding quality of life. The area offers beautiful beaches, excellent schools, a strong medical community, convenient travel access, and a relatively low cost of living—an ideal setting for both professional growth and lifestyle.

We are seeking a motivated, collegial neurotologist committed to clinical excellence and patient-centered care. Candidates with interests in cochlear implantation, skull base surgery, and advanced otologic procedures are especially encouraged to inquire.

I can be reached directly at (904) 887-7296 or [jgreenmd@nflsurgeons.com](mailto:jgreenmd@nflsurgeons.com).

Warm regards,  
J. Douglas Green, Jr., MD
